

DRIFTPRO FLEX

FEATURES

- DriftPro is a globally patented thread system for tunneling drilling tools
- Extensive research, development and field testing to introduce innovative DriftPro concept
- FLEX32 thread is a rigid shoulder drive design at the bit connection for optimal tool performance
- FLEX thread offered in various configurations to accommodate different drilling conditions

BENEFITS

- Most rigid, fatigue resistant, extended thread life in industry
- High energy transfer for improved penetration rates
- Shoulder and thread design promotes less bending stress and easier bit uncoupling
- Improved drilling accuracy and straighter holes achievable
- New FLEX thread profile and pitch promote better cooling and lubrication properties
- Customizable FLEX thread design configurations to suit various drilling conditions
- Prolonged bit and rod thread life increases productivity and reduces operating costs
