

ROCKMORE CR35 THREAD

Conical Shaped Rope Thread

FEATURES AND BENEFITS

- Tapered thread from 35mm to 32mm with more steel volume at bit head
- Conical shaped rope thread for easier coupling/uncoupling
- Designed for Hex 35mm diameter drifter rods
- Increased rigidity and resistance to rod bending for straighter holes
- Longer bit and rod thread life
- Improved energy transfer from bit to rod
- Greater penetration rates
- Lower cost per meter/foot

Higher precision collaring . . .

. . . straighter holes.
